Simpson’s Mini-Max Temperature Indicators provide high quality, accuracy and reliability in a compact case. These microprocessor-based units offer a 0.56” bright red, 4 digit LED display for high visibility and is adjustable through 6 levels of brightness. The four input types and choice of °C or °F display are jumper-selectable and can be changed with no recalibration necessary.

A unique mounting bracket is provided to allow for vertical and horizontal stacking of multiple indicators. All Mini-Max units feature a 3/64 DIN, high-impact plastic case. Screw terminals are provided for easy wiring of the power supply and input signal connections.

**Minimum Depth Indicator - Less Than 2.5” (60mm) of Space Required Behind the Panel**

**Stackable Mounting Bracket Included for Easy Installation**

**4 Digit, 0.56” (14.2mm) High, Red LED Display**

**Standard Screw Terminals for Easy Installation**

**User-Selective Input Type (J or K T/C, RTD Pt100, mV)**

**85-250VAC Power Supply**

**Brightness Adjustment**

**Installation and Panel Cutout**

Mounting Requirements
Insert the Mini-Max through the panel, and then slide the mounting bracket on to the Mini-Max. The mounting bracket allows Mini-Max units to be stacked side-to-side or top-to-bottom and maintain the DIN standard panel arrangements in 24mm by 72mm multiples. Panel cutout instructions for stacking multiple units are provided under “stacking features.”
**Specifications**

**DISPLAY**
- **Type:** 7-segment red LED
- **Height:** 0.56” (14.2mm)

**Display resolution:** 0.1º from -99.9º to 999.9º; 1.0º below -100º or above 1000º; 0.1mV for mV indication

**Uncalibrated instrument:**
Display will flash continuously "INFO FAIL CALB REQD" upon application of power.

**Polarity:**
Automatic, with "-" indication; "+" indication implied

**POWER REQUIREMENTS**
- **AC Voltage:** 85-250VAC @50-60Hz
- **Power Consumption:** 2VA

**Overrange indication (T/C or mV):** The leftmost digit shows 1: "1" (other digits are blank)

**INPUTS**
- **Thermocouple:** J, K
- **Millivolt:** ±70mV (uncompensated for temperature)
- **Lead Resistance Effect:** -13μV/100Ω max.
- **RTD:** Platinum 100 Ohm (0.00385 alpha)
- **Lead Resistance Effect:**
  - 4-wire: -26ºC/100V max.
  - 2- and 3-wire: 1ºC/29Ω max.

**Temperature Coefficient:** ±0.2ºC / ºC

**Input Impedance:** 22MΩ

**APPLICATIONS**

**ENVIRONMENTAL**
- **Operating Temperature:** 0 to 55ºC
- **Storage Temperature:** -10 to 60ºC
- **Relative Humidity:** 0 to 85% non-condensing
- **Warmup time:** Less than 20 minutes

**ANALOG TO DIGITAL CONVERSION**
- **Technique:** 12 bit Successive Approximation (SAR)
- **Rate:** 10 samples per second

**NOISE REJECTION**
- **NMRR:** 60dB, 50/60Hz

**MECHANICAL**
- **Bezel:** 0.94” x 2.83”
  - (24mm x 72mm)
- **Depth:** 2.36”(60mm)
- **Panel cutout:** 0.89” x 2.71”
  - (22.2mm x 68mm)
- **Weight:** 3.5oz (99.2g)

**Case Material:** 94-0,UL-rated, glass-filled thermoplastic

**Wiring Display**

**THERMOCOUPLE**

**TERMINAL**

1 2 5 6

INPUT (+) INPUT (+) BRIGHTNESS (Short to Adjust)

**Example wiring shown for RTD.**

Refer Wiring

**Power Supply:** Connect the power supply to terminals #7 and #8 as shown above.

**Display Adjust:** Connect a short between terminals 5 and 6 as shown. Shorting these terminals will cause the display to continuously cycle through 6 levels of brightness. When the desired brightness level is attained, remove the short. The selected brightness level is stored in memory and will be maintained. To readjust brightness level, repeat the above procedure.

**NOTE:** Recalibration is not required after an input change. If desired, however, procedure is available from Technical Support.

---

**Input Selection**

All Mini-Max Temperature Indicators are configured initially per the customer specifications. Should the application change, the input type can be changed as follows:

<table>
<thead>

See diagram at right for jumper locations.
Stacking Features

The mounting brackets, included with every Mini-Max, can be connected together. Multiple units can be mounted in a single opening, allowing perfect alignment.

To punch one hole for multiple units, be sure to adjust the standard panel cutout dimensions as shown here; otherwise the meters will not fit properly in the hole.

Mounting multiple units is quick and easy. Install the first meter (bottom unit first if stacking vertically). Position the next mounting bracket snugly against the first one, and slide the second meter into place. Repeat for remaining units.

Vertical
Standard cutout

Horizontal
Standard cutout

Application Example

A plant engineer wants to install a meter in a panel to measure the temperature of a nearby tank of liquid. The meter must accept a type J thermocouple input and be capable of measuring at least 0-400˚F. Depth behind the panel must also be kept to a minimum. A Temperature Mini-Max M240-0-91-0-F will meet the engineer’s requirements. Prior to connecting the thermocouple, make sure the jumpers are positioned as follows:

JU1, JU2, JU4 IN
JU3 OUT

WIRING DIAGRAM
Your Mini-Max Temperature Indicator can be configured by making an entry for each box.

**Basic Unit**

- **Power Supply**
  - 0 M240 4 Digit Indicator

**Input**

- 0 85-250 VAC
- J T/C K T/C RTD Pi100
- mV DC

**Output**

- 0 None

**Display**

- C F °C °F mV

* Choose °C or °F for thermocouple or RTD. mVDC input displays mV reading only, not degrees.

---

**Safety Symbols**

- **The WARNING sign denotes a hazard.** It calls attention to a procedure, practice, or the like, which, if not correctly performed or adhered to, could result in personal injury.
- **The CAUTION sign denotes a hazard.** It calls attention to an operating procedure, practice, or the like, which, if not correctly adhered to could result in damage to or destruction of part or all of the instrument.

---

**Accessories**

Simpson thermocouples are available in custom lengths per your application. Calibration type, wire gauge, insulation type and length are determined by your specifications, and entered into the following ordering diagram.

**Thermocouple Ordering Information**

(Termination End: HJ-Beaded, CJ-Solid Bare Wire)

**THERMOCOUPLE PROBES (QUICK DISCONNECT)**

Simpson offers "Quick Disconnect" style thermocouples which include a probe and an ANSI color-coded jack and plug. Each 12-inch thermocouple probe is compacted with MgO insulation, with 316 stainless steel and 0.188 inch diameter outer sheath. Extra plugs and jacks are sold separately. See the table below for ordering information.

**THERMOCOUPLE PROBES (48 INCH LEAD WIRE)**

Simpson's transition joint thermocouple probes are constructed with MgO insulation. The probe includes 48" of Teflon® coated thermocouple wire and stripped leads.
