Featuring an acclaimed easy-to-read display and a high resolution input, the Shunt Meter takes the MAK into a wide range of new applications, where accurate DC current measurement is required.

The MAK Shunt Meter is ideal for DC current measurement applications in marine, leisure, material handling, and industrial applications such as power supplies, load banks and charging systems.

The programmable scale and custom annunciators mean users can tailor the meter to display their critical parameters exactly how they want. Dynamic backlighting, in conjunction with setpoints, means operators are visually alerted when a parameter is out of range. The two outputs can be used to connect the MAK to other systems in the process, meaning the MAK Shunt Meter is much more than just a display.
